Applicant's election with traverse of Group I, claims 1, in the reply filed on 6/6/06 is acknowledged. The traversal is on the ground(s) that Groups I and II should be combined because as amended modulating encompasses activating or inhibiting enzyme activity. Claims 1, 2, 18, 19 and 21 are considered here, claims 3-6 are withdrawn from consideration.

The requirement is still deemed proper and is therefore made FINAL.

Upon resolution of the following issues, further searching and/or consideration may be required.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 2, 18-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Each of the following applies in all occurrences.

Claim 1 is directed to screening a substance but lacks any such step. Claim 1(b) is incomplete as to how cGMP would be formed because there is no reacting step. In claim 1(f) substances have activities, not abilities. Standard method steps may include obtaining, reacting, determining, and correlating. Claim 2 is not understood in context because it has no outcome from claim 1 and what the comparison result would be to indicate the substance enhances cGMP production is not recited. In claim 18 and all occurrences, "the outcome" lacks antecedent basis. Further, claim 18 is not

understood. In claim 19 reference to step (f) is unclear as to what claim is intended.

Claims 18-20 refer to step (f) but not what the value would need to be.

The abstract of the disclosure is objected to because it contains legal terminology. Correction is required. See MPEP § 608.01(b).

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
